**Extend Roof Lifespan,
Reduce Claims: Discover
the Insurance-Saving
Power of GoNano**

Who is GoNano?

GoNano is a pioneer in nanotechnology solutions for roof rejuvenation. Founded on unquestionable science and with the mission to provide sustainable, cost-effective alternatives to traditional roof replacements, GoNano has quickly established itself as a leader in the industry. Our innovative products are designed to extend the lifespan of roofs, protect against environmental damage, and save homeowners and businesses thousands of dollars.

Extensive Testing

ASTM
D3161

Great Winds Standards Testing:
Validates performance under
extreme wind conditions.

UL
790

Fire Proof Standards Testing:
Proves that GoNano does not
adversely effect fire
resistance.

Green Center
IMPACT

Demonstrates that
coatings of GoNano
product reduce impact
penetration depth.

UL
2218

Impact Resistance
Testing: Demonstrates
superior impact
resistance to hail damage.

How GoNano products work

GoNano offers two state-of-the-art nanotechnology solutions tailored to different roof ages and conditions. Our products have also undergone rigorous testing to ensure their effectiveness and reliability.

Penetration:

Nanoparticles
penetrate the shingles.

Restoration:

Shingles regain
flexibility and strength.

Protection:

A hydrophobic layer
forms to repel water.

GoNano Shingle Saver

Ideal for younger roofs up to 10 years old. It penetrates the shingles, creating a protective barrier that prevents granule loss and UV damage, preserving the roof's integrity. It also turns a Class 1 rated shingle into a Class 3 rated shingle after only 1 application. This means tremendous impact resistance to hail and wind damage.

GoNano Revive

Perfect for older roofs aged 8 to 25 years. It rejuvenates aging shingles by restoring flexibility and durability, significantly extending the roof's lifespan. Also benefits from the same impact resistance qualities as Shingle Saver.

GoNano Bio-Boost

GoNano Bio-Boost is a cost-effective solution for protecting and maintaining asphalt shingle roofs. By combining nano technology with renewable bio-oils, it offers a balance of performance and environmental consciousness while helping extend roof life.

What our clients are saying

Austin

Jacksonville, Florida

"This has saved us from a very expensive and complete roof replacement. Now that we have done GoNano, we will never go back. Thank you for all the money you saved us!"

Michael

Upstate New York

"Both my daughter and grand-son have used GoNano because of results on my roof. Now I'm protected for years to come and I have a warranty to back it up."

Carla

Detroit, Michigan

"We couldn't be happier with the treatment done on our 15 year old roof, the entire process took 90 minutes without any damage to our property and I like that I didn't have to worry about my gardens, pets and kids."

David

Aledo, Texas

"I have no more granule loss which is a sign to me that it works and it's now obvious we'll get another 10 years out of our old roof. So we sleep a little better now because we've dealt with people that are looking out for us."

The Growing Impact of Inaction

Without addressing these issues, costs will continue to rise, and customer satisfaction will decline. Policyholders may seek insurers offering innovative and cost-effective solutions. The strain on financial resources could lead to higher premiums and reduced competitiveness in the market.

Roof Replacement vs. GoNano Treatment:

A Cost-Effective Solution for Insurance Companies

Roof Replacement:

Average Cost:

\$18,000

Average Number of Claims Per Year: 3.27 million

Total Annual Cost: Tens of Billions of Dollars

GoNano Treatment:

Average Cost:

\$3,000

Savings Per Claim: \$15,000

**Total Potential Savings Per Year:
\$49.05 billion**

Testing and Certifications

GoNano Shingle Saver and GoNano Revive have been rigorously tested and proven by leading industry standards:

- UL2218: Impact Resistance
- ASTM D3161: Wind Resistance
- UL790: Fire Resistance
- IBHS: Impact Resistance

Real-World Results:

- Increased shingle lifespan by up to 15 years.
- Enhanced resistance to UV damage and granule loss.
- Improved impact resistance, reducing damage from hail and debris.

The Costly Burden of Roof Replacements

At GoNano, our goal is to revolutionize roof maintenance by offering innovative, environmentally friendly solutions that enhance the durability and performance of existing asphalt shingle roofing products. We are committed to sustainability and to providing products that not only protect roofs but also reduce waste, save money and contribute to a greener planet.

Impact Statistics:

Average cost of roof replacement: **\$18,000**

Average number of claims per year: **3.27 million**

Total annual cost for roof replacements: **tens of billions of dollars**

Key Benefits

Extended Roof Life:

GoNano Shingle Saver and GoNano Revive can extend the life of roofs by up to 15 years, providing reliable alternatives to full replacements.

Cost Reduction:

By integrating our products into your offerings, you can reduce claim frequency and costs.

Customer Satisfaction:

Improve customer satisfaction and retention with quicker, less disruptive solutions.

Warranty Preservation and Confidence:

GoNano products do not void shingle manufacturer warranties. In fact, GoNano is so confident in the quality and performance of our products that we will honor a homeowner's shingle warranty if anything should happen after the application of our products. This commitment provides an additional layer of assurance for both policyholders and insurance companies.

GoNano Preserves and Honors Shingle Warranties — Protecting Your Policyholders!

Application Process

GoNano Shingle Saver and GoNano Revive are easy to apply and can be done quickly with minimal disruption to homeowners. Our professional application process ensures that the nanotechnology penetrates deeply into the shingles, providing long-lasting protection and rejuvenation.

Step-by-Step Guide:

- 1 Inspection:** Thorough inspection of the roof including minor repairs where applicable.
- 2 Cleaning:** Roof is cleaned to ensure optimal adhesion.
- 3 Application:** GoNano Shingle Saver or Revive is evenly applied.
- 4 Drying:** The product dries, forming a protective barrier and is ready to battle the elements in less than 24 hours.

In most cases a GoNano application is done in under 1 hour and only requires 2 labourers.

Environmental Impact

Our products are environmentally friendly and have no impact on vegetation, animals or humans. GoNano reduces waste by extending the lifespan of existing roofs and minimizing the need for replacements. This not only saves money but also supports sustainability efforts.
